

Partner Power Hour: Build pipeline with Cortex XDR

Positioning Cortex XDR for success

Lauren Harrington, Sr. Partner Services Architect - NextGen Security

Rohan Oberoi, Lead - Cortex GTM

Regan Hackett, Sr. Global Partner Enablement Manager

Agenda

- **What is Cortex XDR?**
- **Cortex XDR demo**
- **What's in it for you?**

Cyberattacks target every weakness at record speed

84%

of attacks operate across
multiple domains

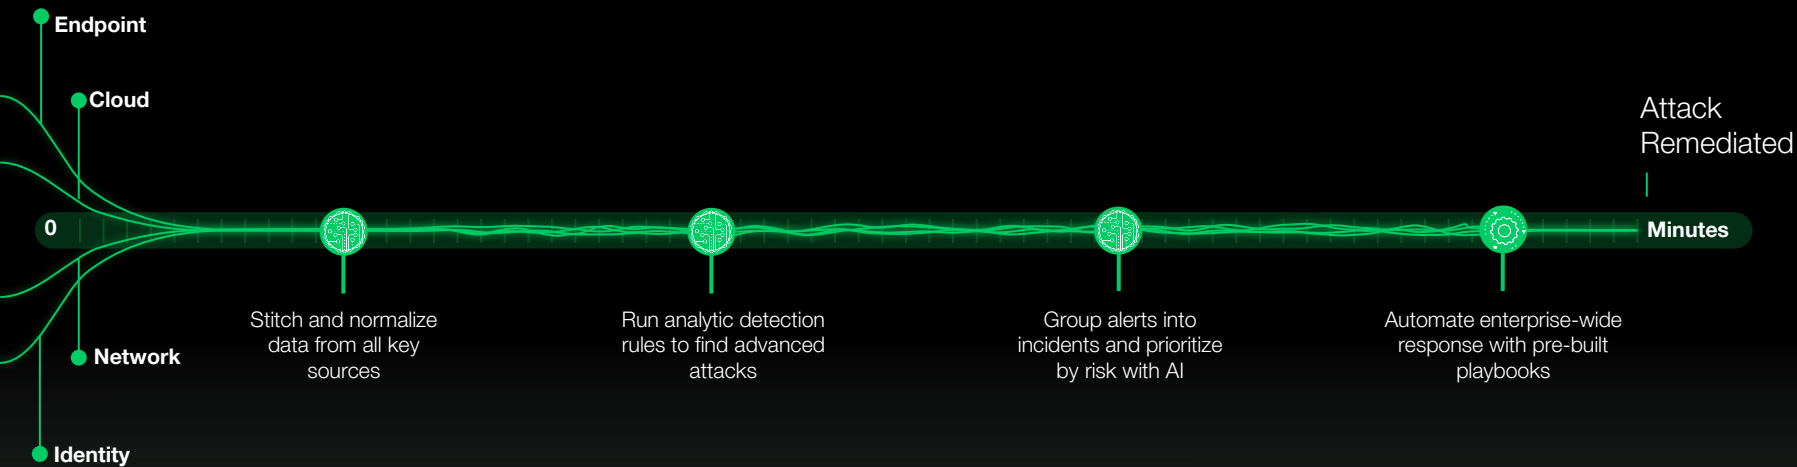

72%

of attacks target
endpoints

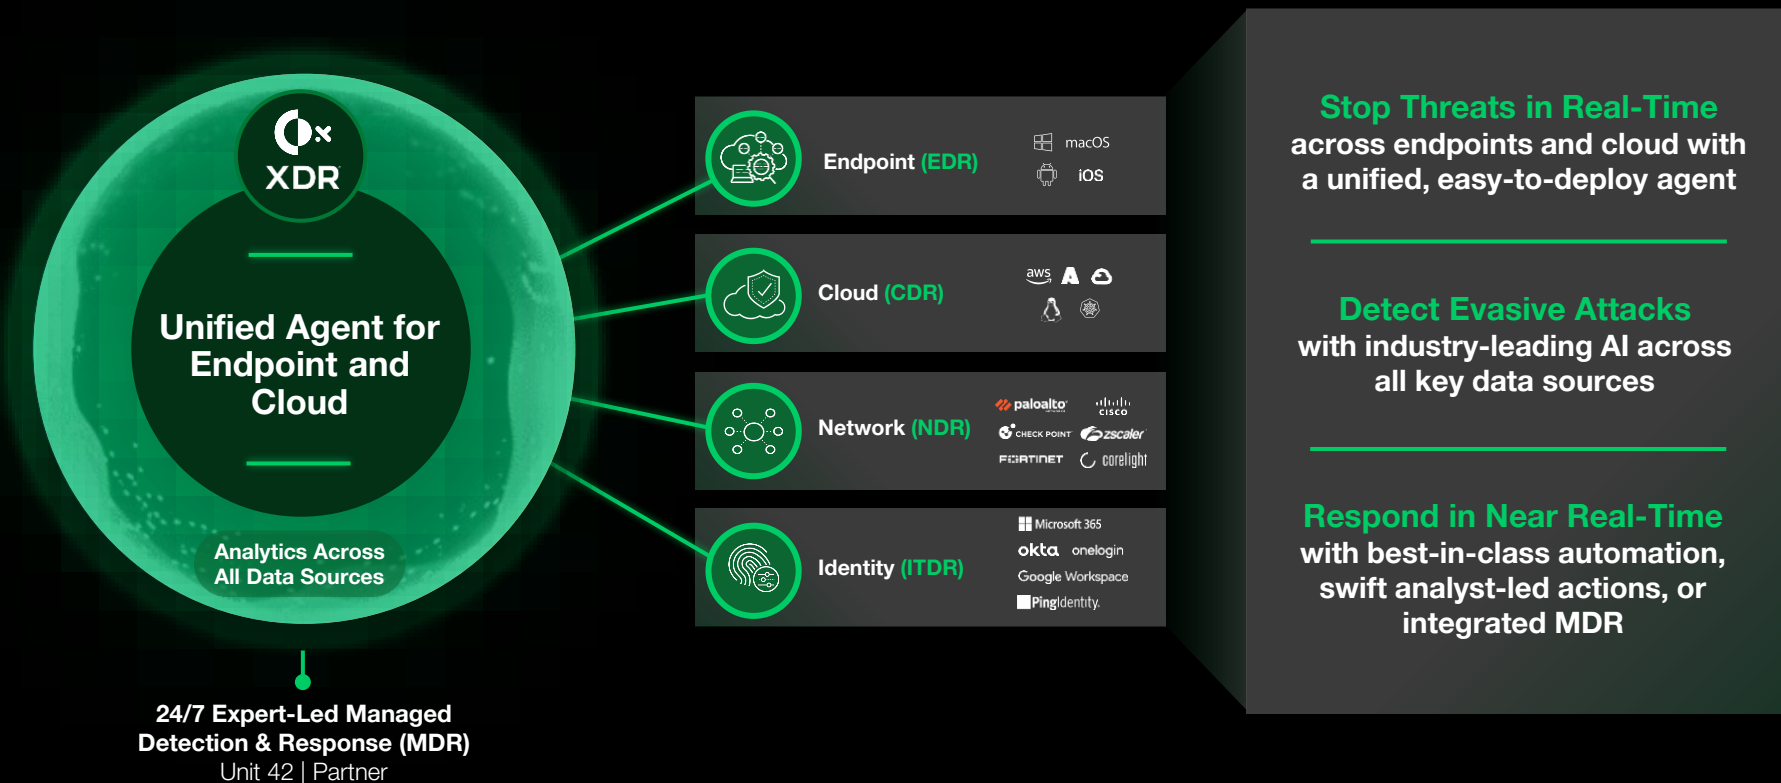

25 min

for a Ransomware attack
to succeed using GenAI

To outpace adversaries, you need **more data** with **AI** and **automation** handling manual work

Cortex XDR: The clear leader in AI-driven endpoint security

Detect evasive attacks with advanced AI across all key data sources

Cortex XDR is a proven endpoint security leader

100% detection in MITRE
ATT&CK Enterprise
Evaluations without
configuration changes

Customer journey to SOC Transformation

Cortex XDR in action

Partner Incentives: Why make the switch to Cortex XDR?

Endpoint Security Upgrade Incentives

Partner sales reps and SEs who close/win qualifying opportunities can earn up to \$7,000 USD based on eligible products and deal size opportunities.

5% rebate on Closed-won opportunities with Cortex XDR product specialization

Large future upside through **upgrade paths to XSIAM** (5-10x increase in ARR) and Cortex Cloud

Easily **attach your deployment services and MDR services** to increase deal size

Who should you target?

Customers with legacy EDR solutions are most susceptible to displacement

Customers must be purchasing at least 500 EPs over a 3 year term

Customers that have already purchased PANW products (especially firewall) are also strong candidates

Competitive pricing offers and discounts available to customers with any incumbent vendor

Elevating XDR: Value, Capabilities, and Competitive Edge

Unmatched Visibility and Detection

Cortex XDR gives unmatched visibility and detection against advanced threats. It's the only vendor to achieve 100% detection in MITRE Engenuity evaluations, made possible by our continuous, comprehensive telemetry collection. This stands in contrast to Microsoft, CrowdStrike and SentinelOne, which collect less continuous telemetry data.

Rapid response to breaches

Cortex XDR remote terminal offers significantly more capabilities than our competitors. With our actionable file explorer, task manager, and built-in Python and PowerShell interpreters, your team can conduct remote investigations and incident response much faster and more effectively. Unlike SOAR capabilities reliant on third party vendors, Cortex XDR's playbooks are native to the platform and drive further time savings.

Reduced SOC complexity

Cortex XDR natively stitches data across key security sources and delivers ML-driven detections to create a cohesive attack story, handling more manual SOC workflow than any other vendor. Other XDR players, claim to offer "XDR" solutions but require separate data lakes for non-endpoint telemetry, reducing their ability to deliver ML-based analytics on combined data sets which is critical to security outcomes.

\$0.6M XDR Pro (Q3'25)
\$1.8M XSIAM (for FY26)

Replacing CrowdStrike at a large hospital chain

1. How we got in?

- Palo Alto Firewall customer since early 2024
- Relatively happy CrowdStrike XDR customer; not actively looking to replace EDR
- Good relationship with the CISO following FW project; leveraged it to set up an XSIAM workshop (Sep'24)
- Developed a relationship with customer's favored partner through Firewall project, continued to work together as CRWD replacement opportunity arose
- Maintained regular contact with the customer through product announcements, technical webinars
- Uncovered CRWD EDR pain points on lack of post sales support and issues with host-based firewalls

2. What we did?

- XSIAM Hands-On-Workshop hooked customer on SOC transformation, giving us an in to introduce EDR
- Cortex Technical Sales-led discovery helped us understand some underlying issues with CRWD deployment
- Partner provided insight into customer budget and requirements, beating CRWD on price, earning greater margin vs renew
- Free Cortex XDR eval environment for POV to compete with CRWD sandbox environment
- During POV, we included additional sessions to address specific customer interests and use cases
- Secured win in Apr'25 with customer references; addressed concerns over a 1-month migration timeline by securing the same team as at the successfully deployed reference customer

3. Why we won?

Product

- **Primary pain point was host-based firewalls:** Customer was doing double work with CRWD due to ingress and egress out of a single port, while XDR simplified the same operation with bidirectional flow
- **More intuitive GUI:** Investigating what triggered an alert was easier in our console vs CRWD, which required searches on process IDs

Sales motion

- **Strong ongoing engagement:** Weekly meetings throughout the cycle, twice during POV. Cultivated multiple champions to help uncover pain points
- **Focus on resolving pain points:** Scheduled a dedicated session to address each product concern (e.g., host-based firewalls)
- **Peer references:** Got them two customer references within the same vertical

Next Steps: Turn Enablement Into Action

Target + Activate

- **Identify Your Targets:** Look for accounts with legacy vendors renewing in 1-2 years.
Why it matters: Proactive timing gives you a competitive advantage by engaging customers before they're in a renewal cycle
- **Initiate a conversation** with target accounts.
Why it matters: Early engagement uncovers pain points and builds rapport, positioning you as a trusted partner.
- **Register an opportunity.**
Why it matters: Formalizing the deal gains team visibility and secures the necessary support to close.
- **Connect with the Palo Alto Networks sales team.**
Why it matters: Leveraging team expertise provides critical resources and insights for winning complex deals.
- **Schedule a demo using refreshed tools.**
Why it matters: A **compelling demo** is the most powerful way to show value and differentiate your solution.

Master the Message

Complete the Cortex XDR Sales Certification to sharpen your positioning.
